WEBSITE

Asabix is a company that focuses on web development and has offices located in Poland and Ukraine. Our mission is to create digital products that transform our client's ideas into successful businesses, attracting new customers and increasing profits.

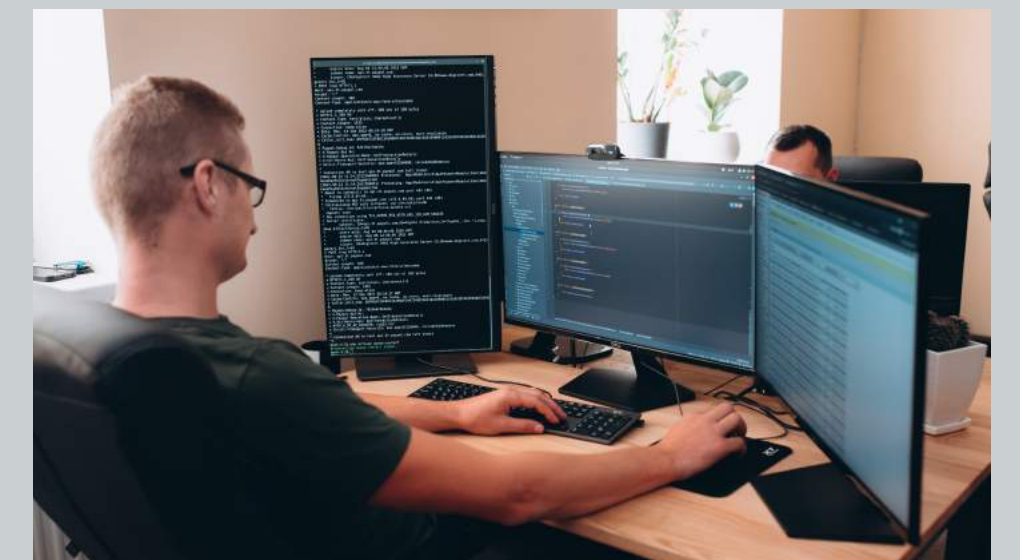

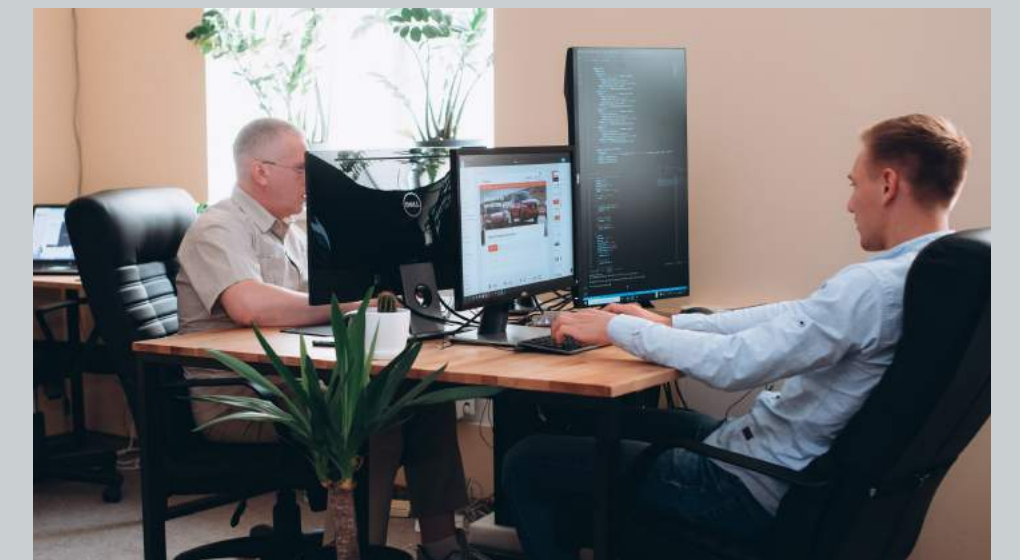

The history of Asabix began in 2017 when we initially focused on supporting simple websites with ready-made content management systems. Over time, we expanded our services to include web application development, including high-performance applications on modern PHP and JS frameworks.

Our experts have successfully delivered projects in the USA, Spain, the UK, the UAE, Lithuania, and the Czech Republic, showcasing our global presence and ability to adapt to different markets.

The goal of Asabix is not only to provide IT services but also to become reliable partners for our clients. We bring together experienced developers, deep technical expertise, and a sense of responsibility to create unique software solutions.

We believe that the company's most valuable asset is its specialists. Our team strives to achieve the best results through teamwork and a commitment to delivering high-quality work.

Our guarantee: ensuring quality across all our services!

+ Web development

Select our team and receive turnkey solutions that will be beneficial for your business. Reach the widest possible audience and increase sales with modern IT technologies.

+ Support & service

The Asabix team not only develops new ones but also supports and improves existing projects. If your product requires modernization, optimization, or technical support, we will be happy to help.

+ Development and integration of APIs

We will help to work out or connect the API of the world-famous services, such as shipping, payment, and sales systems, etc. Enjoy the convenient decisions for your web and mobile applications.

+ Quality Assurance

Explore our testing services to ensure the reliability and functionality of your digital solutions. Our expert team conducts rigorous testing protocols to identify and resolve any issues, guaranteeing a seamless user experience for your audience.

+ UI/UX design

Our team of designers expertly establishes the interaction between business goals and user needs, ensuring top-notch UI/UX. We craft visually appealing and intuitive interfaces, incorporating modern elements and corporate flair.

+ Dedicated team

Hire a team of specialists for your project. This will increase the level of understanding of business tasks, allow you to independently communicate with employees, as well as define the tasks and goals of the product.

ask@asabix.com   +38 (096) 880 99 00   +48 570 337 815   WEBSITE

Let's start: choose your desired solution

Dedicated team

- ✓ You receive your own remote IT department.
- ✓ You can determine the number of employees.
- ✓ You or your manager directly contacts and supervises the developers.
- ✓ Suitable for complex projects with a realization period of 6 months.

For those who appreciate the team's involvement in the project. Our developers are completely immersed in work, get acquainted with the product in detail, and are exclusively engaged in your project, without being distracted by other tasks.

Hourly wage

- ✓ You set the basic tasks and change or add new solutions during the work process
- ✓ We record the work hours and bill an invoice for the spent time after the project approval (including all necessary reports).
- ✓ You don't need to provide documentation of the entire project, just a schematic concept is sufficient.
- ✓ Flexibility and ease of making changes.

Choose an hourly contract if you want to fully control all processes, test new solutions, and also make adjustments

Fixed-price contract

- ✓ You provide us with ready-made documentation or we develop it together.
- ✓ We approve the total price and terms of work.
- ✓ Our team is involved in development and provides all the source files to you.
- ✓ Everything that is not included in the agreement is paid separately.

This type of cooperation is ideal for those who already have a clear idea and vision of the final product, or possess a ready-made project and want to modify and improve it.
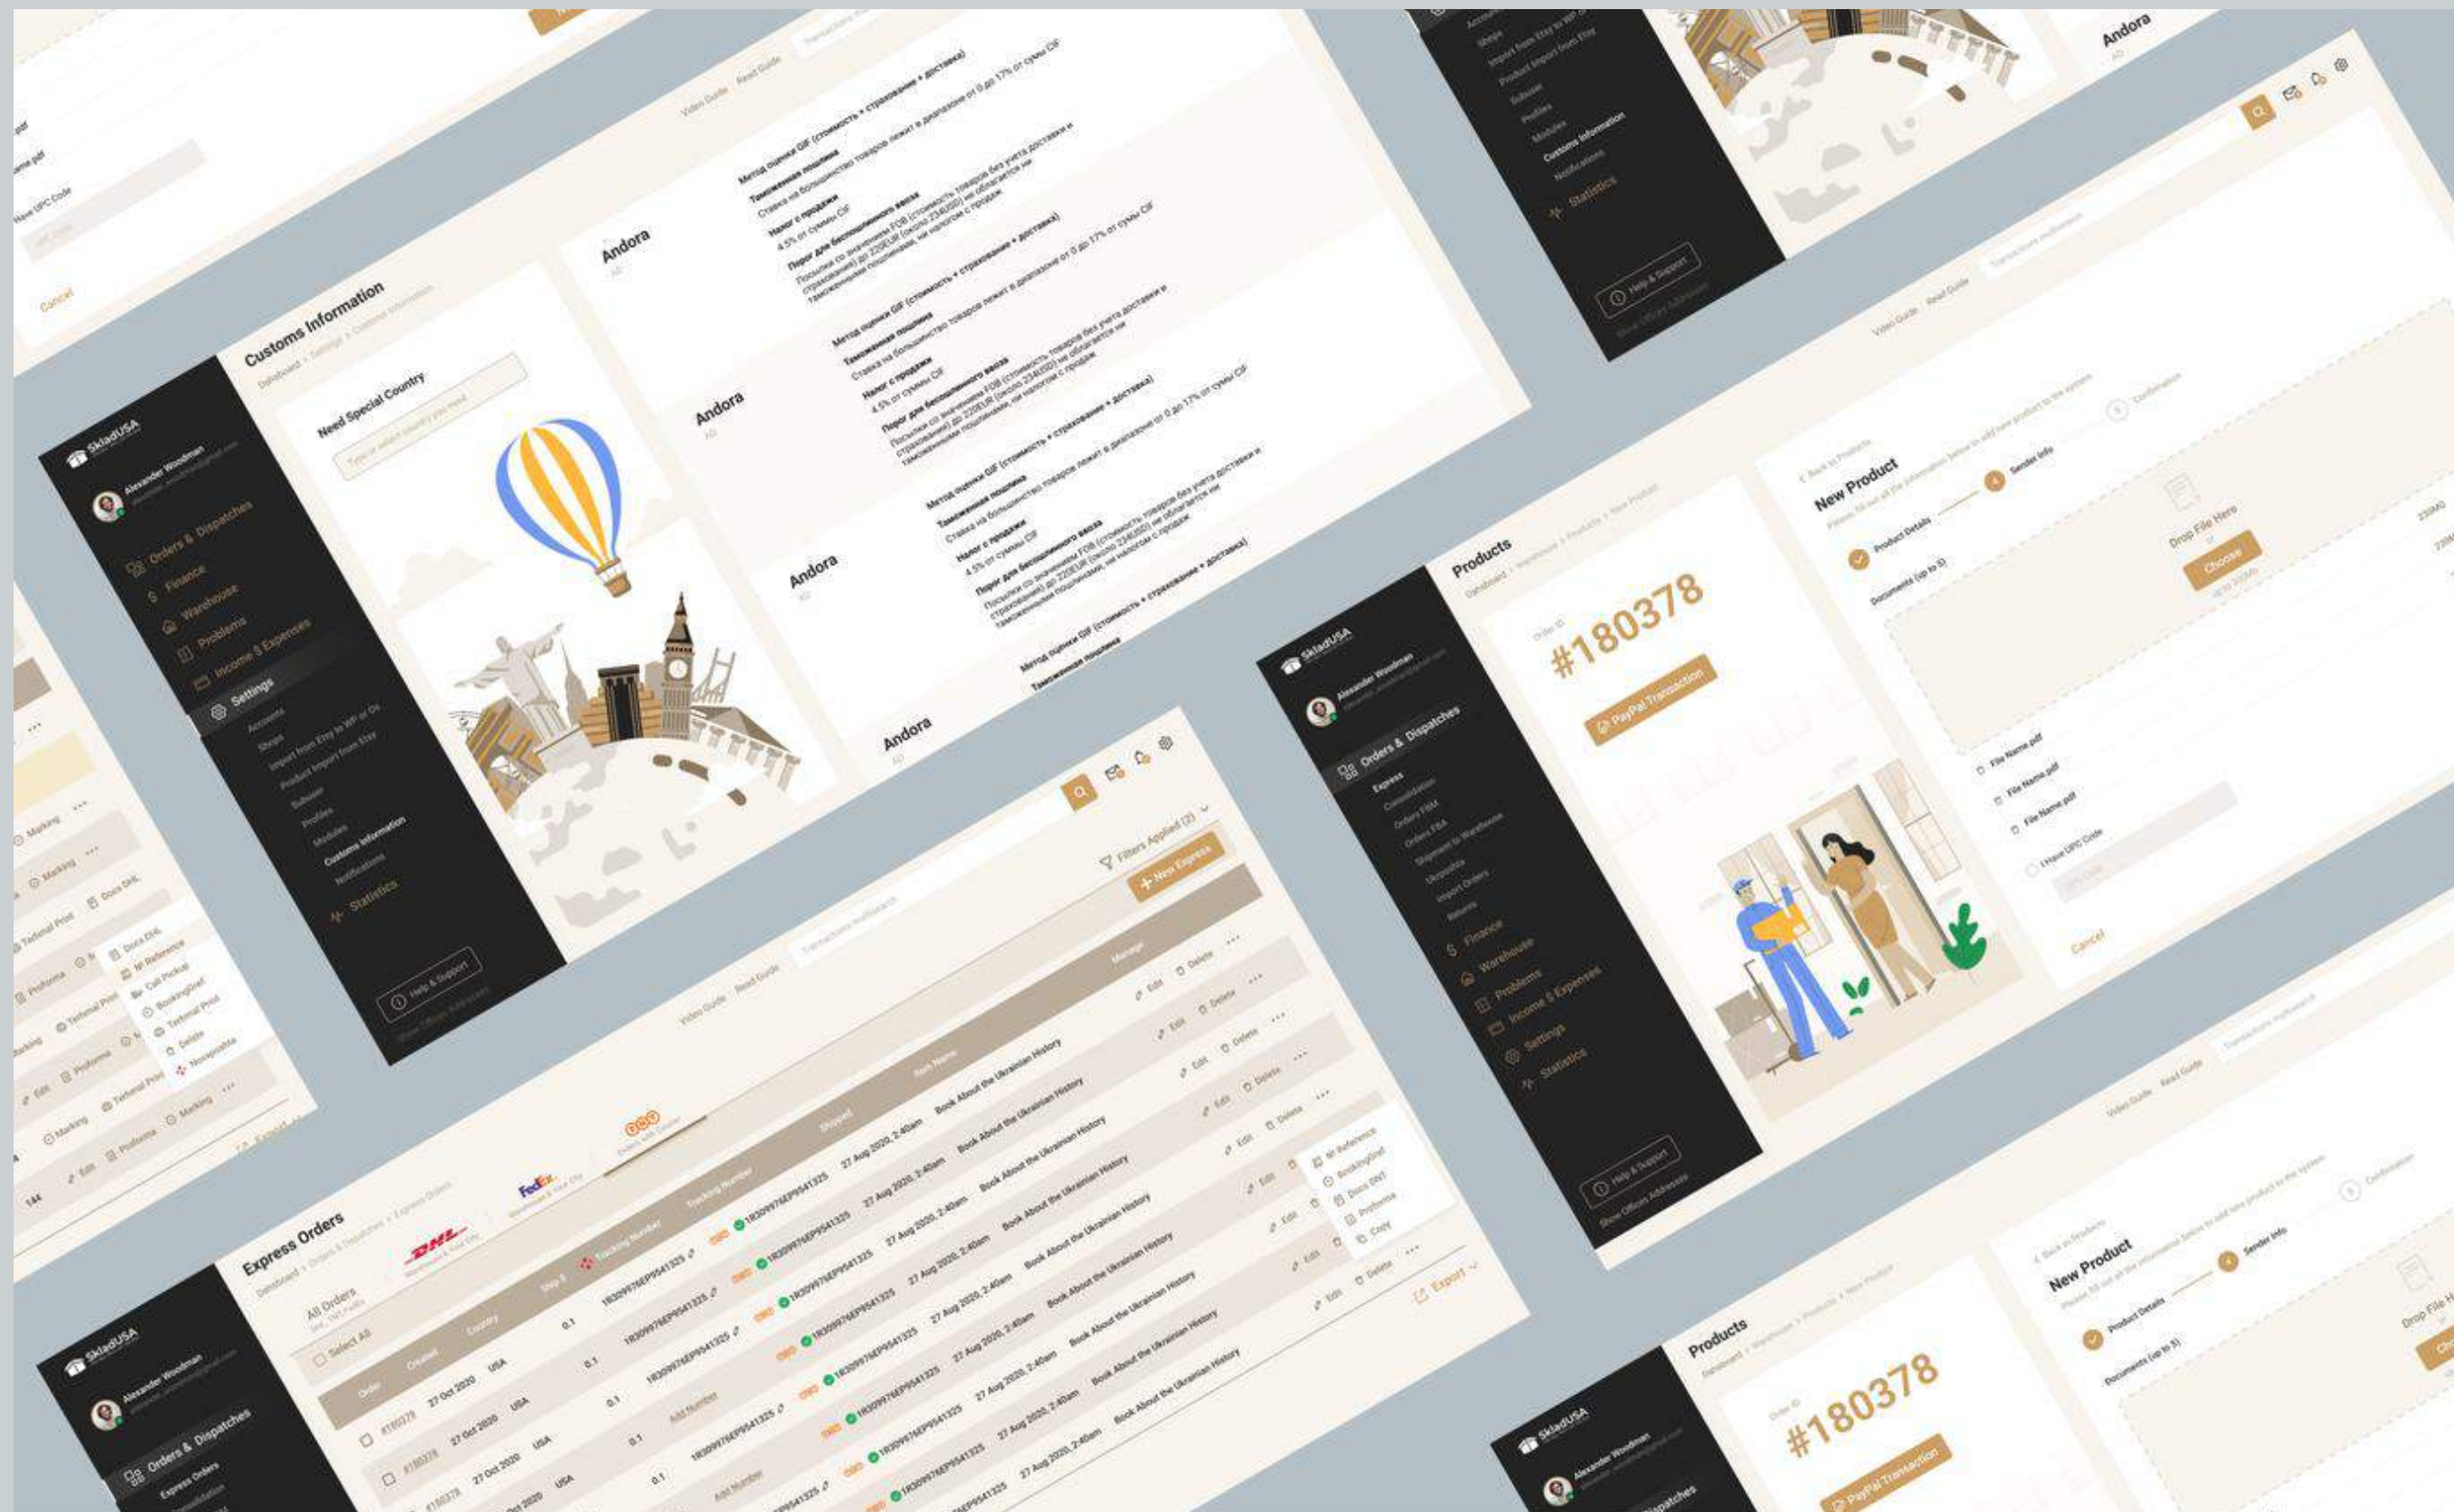

Custom CRM Solution for SkladUSA Logistics Company

Development and Support

Asabix developed a CRM for SkladUSA, an American-Ukrainian company that facilitates the sale of goods to entrepreneurs from Ukraine and EU countries on Amazon, eBay, Etsy, and other global marketplaces. The task was to create a new system covering goods management, finance, delivery, and other functions with a straightforward interface, guaranteed data security, scalability, and integration with necessary services. The new CRM propelled SkladUSA to become a market leader in logistics services for e-commerce in Ukraine and the EU.

Web Platform Development for USA Pulltabs LLC

Development and Support

Asabix created an online platform for USA Pulltabs, a prominent Wisconsin-based company known for its proficiency in designing, manufacturing, marketing, and wholesaling lottery tickets (scratch cards). The objective was to eliminate the inconvenience of Excel record keeping by implementing a dynamic cloud-based solution that includes automated and transparent processes and modules for comprehensive order, invoice, product, user, and data management. USA Pulltabs has improved its customer relations, inventory management, and marketing strategies by implementing this cutting-edge web application, positioning it at the forefront of innovation in the industry.

Online Store Development for Ukrainian Clothing Brand Etnodim

Development and Support

Asabix was tasked with creating an online store for Etnodim, a prestigious Ukrainian brand known for its modern embroidered and linen outfits, serving discerning consumers in Ukraine, the USA, and Europe. We aimed to build a website with cutting-edge, responsive design, an intuitive search function, a user-friendly catalog with advanced filtering options, and visually stunning, high-quality imagery. We incorporated a seamless shopping cart that offers promotional codes, powerful SEO optimization tools, and seamless payment system integrations. As a result, a dynamic online platform that not only facilitates the sale of Etnodim's exquisite products but also serves as a potent vehicle for enhancing the brand's market presence and outreach.

# Web Application Development for Superior Vending™ Company

Development and Support

Asabix was commissioned to design a website for Superior Vending™, a prominent American company specializing in selling ATMs, vending machines, and the organization of bowling and billiard tournaments and leagues. We aimed to develop a website with a cohesive corporate identity and responsive design, featuring a user-friendly control panel for seamless navigation. Our integration includes Square and PayPal payment systems, a robust calendar of events, and a flexible registration form. The result is a website that is highly functional and streamlines the registration and payment process, leading to increased sales and brand loyalty. Superior Vending™ now boasts a digital platform that showcases its offerings and enhances the overall customer experience.

CRM/ERP System Development for Auto Service Businesses

Development and Support

Asabix developed a customized CRM/ERP system specifically tailored for a car service station, aiming to revolutionize its operations and improve customer interaction. This comprehensive platform can simplify the entire process, from managing the customer base and scheduling technician workloads to monitoring spare parts inventory, facilitating financial transactions, and overseeing various aspects of the business. By centralizing these critical functions, the service station's team achieves newfound levels of organization and efficiency while owners gain complete visibility and control over every facet of their operations. The customized CRM solution enables service stations to optimize document flow, streamline process management, enhance transparency, and drive profitability.

Website Development for SkladUSA Logistics Company

Development and Support

Asabix created a website for SkladUSA, a well-known logistics firm with facilities in the USA, UK, Poland, and Ukraine. The company provides comprehensive services and logistics support to online sellers from Ukraine and EU countries. We aimed to develop a website in multiple languages that showcases the entire range of the company's services and features an intuitive interactive calculator for calculating shipping costs worldwide. Cross-browser compatibility, responsive design, and fast loading speed were combined, resulting in a flawless user experience on any device.

CRM Solution for Download-manager.online Company

Development and Support

Asabix spearheaded the development of a comprehensive CRM system to automate company sales, customer service, and data collection processes. Our mandate included creating user and administrator accounts, implementing diverse subscription models, integrating seamlessly with payment systems, and incorporating robust statistics, reports, and other essential functions. As a result, a cutting-edge CRM system has optimized internal processes, increased customer loyalty, and driven revenue growth for the company. Thanks to the new system, processes were streamlined, customer loyalty was improved, and profits were increased.

Online Furniture Store Development for Aqua Rodos Manufacturer

Development and Support

Asabix accepted the challenge of developing an online store for Aqua Rodos, a prominent furniture manufacturer in Eastern Europe known for exporting its goods to various countries worldwide. Our objective was to create a refined website that is meticulously optimized for mobile devices and search engines, has intuitive product search functionality, and is seamlessly integrated with other online platforms for importing goods. The company's new website is equipped with a high-quality online catalog, a blog with valuable articles, a subscription to promotions, and automated loyalty programs for regular customers, which helps them achieve their business objectives.

Web Application Development for Real Estate Search in the UAE

Development and Support

Asabix developed a sophisticated web application for a leading real estate agency in the UAE, which offers a diverse range of properties, from standard apartments to premium-class residences. Our objective was to create an easy-to-use web application with five language versions, each featuring an integrated Google map, robust filtering functionality, and detailed property listings that included photos and immersive 3D tours. The new site has become convenient for users with any level of computer experience and has a significant increase in customer loyalty.

Reviews from satisfied clients

Diana Banda

We worked together on the site Yaponahata. The project seemed simple, but there were many additional requirements in the development process. The team coped with it. The guys work quickly and cope with any task. It was very important in my project. The team respects the deadlines and remains in close contact with the client.

Artem Shishkin

We worked with Asabix company on the development not of the simple project - the online constructor cooverbox.in.ua. The company did a mobile version and many other improvements. Also, together with Asabix we started and adapted the project under other market. The work is accurate 'technical requirement — realization', with an understanding of the matter, efficiency and steps towards the client. I recommend to all.

Alexey Kapusta

Working with Asabix is absolutely pleased. For all time there were no problems at work. All of our site requirements have been implemented. The company will always suggest how to better approach a particular task. If you want to get a quality product within a specified time, contact Asabix.

Oleh Ladan

Been working with Asabix for a few months, been very happy with the service. Very quick at responding and providing great solutions. Would recommend them for any project in Symfony, and with API. Tried others before, glad I found them sooner than later.
